

APPLIANCE SENSORS

TE Connectivity (TE) is a global technology leader, providing connectivity and sensor technologies essential in today's increasingly connected world. TE is one of the largest sensor companies in the world. Our sensors are vital to the next generation of data-driven technology.

Today's smart and green appliances are built using more efficient designs, meeting the latest regulations while saving energy, water and time. Customers rely on our sensor technologies to enable appliances to respond to human touch, sense vibration, adjust to loads and operate more efficiently. We work to develop standard and custom solutions that can monitor humidity, water levels, position and temperature. Our products contribute to new levels of convenience and productivity in a wide range of household appliances.

APPLICATIONS

- Clothes Dryer
- Cooktop
- Dishwasher
- Household Oven
- Microwave Oven
- Refrigerator
- Small Appliances
- Washing Machine
- Water Heater

- FLOW
- FORCE
- HUMIDITY
- LIQUID LEVEL
- PHOTO OPTIC

- PIEZO FILM
- POSITION
- PRESSURE
- TEMPERATURE
- VIBRATION

FLOW SENSORS

FCS-01

The FCS-01 flow switch can be mounted in any axis and is designed with 3/8" BSP threads for easy

FORCE SENSORS

<u>FX19</u>

The FX19 units are intended for OEM use in laboratories, hospitals or consumer product applications establishing a breakthrough price performance value for compression load cells.

FX29

The FX29 is a compact compression load cell that offers exceptional priceto-performance in a robust sensor package with a millivolt, analog or digital output signal.

FS19

The FS19 load cell, with ranges from 500g to 3,000g, uses proven MEMS sensor technology.

HUMIDITY SENSORS

HS1101LF The HS1101LF relative humidity sensor is designed for high volume, cost sensitive applications.

HTU21D

The HTU21D(F) relative humidity sensor provides digital outputs for humidity and temperature in I²C formats

HTU31 The HTU31 humidity & temperature sensor is one of the smallest and

most accurate humidity sensors on the market. Available in digital and analog versions, the HTU31 provides fast response time, precision measurement, low hysteresis and sustained performance, even in the harshest environments.

HTU3500

The HTU3500 series is a dedicated humidity and temperature plug and play transducer designed for OEM applications where reliable and accurate measurements are needed

HTM2500LF

The HTM2500LF is a dedicated humidity and temperature transducer designed for OEM applications where a reliable and accurate measurement is needed.

assembly uses a silicon planar diffused photodiode specially designed for medical applications. It features high efficiency and fast response.

VIBRATION SENSORS

LIQUID LEVEL SENSORS

The EVS722 liquid level switches can

be used in a variety of applications

including sump control, waste water

The LS509-31 liquid level switch is

applications up to 110°C, including

boiling water. It is designed with a

sensing.

ELM-4000

level detection.

EPM-4001

The LDS809-21 liquid level switches

offer reed switch technology with a

Level Sensors

Level Sensors

1/2" NPT fitting for simple installation

manufactured from PPs material for

level and coolant level indication.

EVS722-51

LS509-31

0

3022/3028 The Model 3022 and 3028 are silicon MEMS accelerometers in a Wheatstone bridge configuration

LDTC Family The LDTC family is a low-cost piezo

film cantilever-type vibration sensors offering moderate sensitivity over a useful frequency band up to 200 Hz. Pins are designed for easy installation and are solderable.

DT1/SDT1

MiniSense 100 The MiniSense 100NM is a low-cost cantilever-type vibration sensor offering moderate sensitivity over a useful frequency band up to 200 Hz.

PIEZO FILM SENSORS

POSITION SENSORS

<u>KMA36</u>

The KMY/KMZ linear magnetic field sensor can sense very weak magnetic fields, like earth's magnetic field, or fields generated by small magnetic particles.

The MS32 is a magnetic field sensor which is built in the form of a Wheatstone bridge.

KMT36H The KMT36H is a magnetic field sensor utilizing the anisotropic magneto resistance effect.

KMT32B/KMT37 The KMT32B and KMT37 are magnetic field sensors based on the anisotropic magneto resistance

universal magnetic position sensor IC for precise rotational or linear measurement with a resolution up to 0.04 dearee.

The DPL/DPN-series is modern SMD technology based small board-level dual axis inclinometer applying conductive technology.

PS-1/PS-2 The PS magnetic position sensor is constructed with a robust nylon housing for various applications including door interlocks, hook switches and security systems.

The PM series magnet is compatible with the PS1 and PS2 series magnetic

Platinum Thin Film Sensors The platinum thin film temperature sensor are designed to provide precise, stable measurement in

TSYS Series

Oven Sensors

PRESSURE SENSORS

The MS5525DSO is a digital small

outline pressure sensor with SPI and

The M3200 pressure transducer, with

pressure, even for difficult media such

analog or digital output, is suitable

for measurement of liquid or gas

as contaminated water, steam and

profile solution.

The oven temperature sensors provide a high temperature rugged assembly that can be fully customized for accurate and reliable oven cavity temperature sensing.

Refrigeration Molded Probes

are designed for high volume OEM applications where a rugged, reliable design is required.

The air sensor is available in a range of configurations for sensing air temperature. Designs can include various sensing elements and allow measurements.

Surface Sensors The surface temperature assemblies provide accurate and fast thermal response on a wide range of surfaces

Pointed Food Probe thermistor assembly designed for temperature monitoring of meats and sauces and is fully customizable.

and can be configured in many ways.

TSD Series The TSD series digital thermopile sensors include an infrared sensor and integrated signal conditioner. These thermonile sensors can directly

through an I²C interface.
