get up to speed with the

.. increases productivity

Utilizes pneumatic power for automatic operation of hand crimping tools. Fast and quiet, it accommodates a wide variety of both short and long handled tools...and opens automatically for the next crimp. Foot operated...both hands are free so the operator may concentrate on delicate and accurate crimping.

.. decreases medical claims

Here is a device that eliminates slow, costly and fatiguing hand crimping. By giving the operator a "third hand" through the use of foot control, easier and faster production is accomplished. The Universal Power Crimper not only eliminates operator stress and strain, it reduces time and production losses. The Universal Power Crimper is designed to provide foot controlled pneumatic power assistance for operation of hand crimping tools.

.. compatible with many other manufacturer's tools

Most manufacturer's tools will work in the Universal Power Crimper: Amp, Buchanan, Burndy, Bendix, Berg, Clark, Daniels, Deutsch, Molex-ETC, Wearnes Hollingsworth, ITT Canon, Molex, Thomas & Betts and many more.

At 70 psi to 120 psi this device can exert up to 600 lbs. of force with, or without adaptors, to operate over 90% of existing hand-held crimp tools today. The device performs in the same manner as an operator's hand, thereby conforming to the MIL-STD requirement which governs the use of ratchet action tools. The need to rewrite the crimping instructions is eliminated.

The operational swivel mounting base is recommended—it positions the crimp tool in virtually any orientation.

universal power crimper

benefits

benefits

THIS PRODUCT WILL HELP REDUCE REPETITIVE STRESS SYNDROME.

ELIMINATE THE TEDIOUS BURDEN OF MANUALLY HAVING TO CRIMP WITH A HANDTOOL.

THE SAVINGS IN LABOR/TIME REDUCTION WILL PAY FOR THE CRIMPER IN A SHORT TIME. SEE DOLLAR SAVINGS YEAR CHART ON THE BACK OF THIS BROCHURE.

THE POWER CRIMPER CAN ADAPT TO JUST ABOUT ANY CRIMPING TOOL.

ALLOWS THE INDIVIDUAL WHO IS CRIMPING TO HAVE A FREE HAND. EASY TO OPERATE, THE POWER CRIMPER PROVIDES A UNIFORM CONSISTENT CRIMP BY BOTH SKILLED AND UNSKILLED EMPLOYEES.

Dollar Savings Per Year Chart

% of time of tool in use		Savings—based on % of crimp Labor/Time Reduction		
%	Daily Average	10%=\$2.50/hr.	30%=\$7.50/hr.	50%=\$12.50/hr.
25	2 hrs.	\$1,250*	\$3,750	\$6,250
50	4 hrs.	\$2,500	\$7,500	\$12,500
75	6 hrs.	\$3,750	\$11,250	\$18,750
100	8 hrs.	\$5,000	\$15,000	\$25,000

*With as little as 25% utilization and as low as 10% time reduction, the Power Crimper will pay for itself in less than six months. With an average time reduction of 30%, you should realize an annual labor cost savings from \$3,750 to \$15,000 per operator. The table is based on 2,000 worker hours per year at \$25.00 per hour, including overhead.
